## AQUA DRILL INTERNATIONAL

The world leader in specialty industrial pipe and tube cleaning, is pleased to put cutting edge technology, more than 11 years experience, highly trained, qualified and innovative personnel at your service. Aqua Drill International's engineering has developed numerous unique and patented technologies tailored to the specific requirements of our customers. All proprietary technologies are manufactured "in-house" under strict quality control and exclusively used by the Aqua Drill Group. Our motivated engineering and operations team is ready to solve the most complicated pipe cleaning problems and to deliver an unsurpassed cleaning quality to your project.

## QUALITY

The Aqua Drill Group has built its reputation on quality cleaning. It is our commitment to Client satisfaction to deliver superior quality and to continually improve our performance at every level.

## SAFETY

Aqua Drill International's dedicated Safety Managers and the daily training of our skilled and experienced personnel reflect the paramount attention of our organization to perform any project with highest safety standards. The safety features built into our high performance equipment are above industry standards. In an emergency the Aqua Milling® unit can be shut down in half of a second.

## AQUA MILLING® PROCESS

Our unique, proprietary Aqua Milling® Process is a second to none pipe cleaning technology for the most complicated pipe cleaning applications. Aqua Milling® removes the hardest incrustation from internal piping employing high energy water jets and more than one hundred eighty different customized cleaning tools. The Aqua Milling® process allows the optimization of all cleaning parameters, such as cutting speed and total overlap of cutting tracks, providing full surface coverage.

# *the unique* Aqua Milling *technology*

- Temporary and long-term maintenance services
- Turnarounds
- Pre-commissioning service before start-up
- Engineering and design of specialty equipment to solve customer problems

## INDUSTRIES TO BE SERVICED

- Refineries / Petrochemical
- Pulp and Paper Mills
- Metals, Mining & Manufacturing
- Municipalities
- Power Plants
- Oil & Gas Production
- Off shore & marine
- Rubber & Tire
- Terminals
- Food Processing / Sugar Mills
- Chimney Stack Cleaning

## PRE-COMMISSIONING START-UP SERVICE IN NEW CONSTRUCTION

Our Aqua Milling® technology has allowed us to become the first service company in the United States, that was able to totally remove mill-scale and foreign materials from steam piping systems in new construction, by only using water. Due to the unequaled cleaning quality of Aqua Milling®, the duration of steam-blows can be reduced to 45% - 60%, with significant savings in de-mineralized water, fuel, and critical path time. The technology has been used by major companies to accelerate the plant start-up in new construction.

## NEW CONSTRUCTION APPLICATIONS FOR AQUA MILLING®

- Power Plants
- Methanol Plants
- Refineries
- Cokers (delayed & flexi)
- Ethylene Plants
- HRSG's (chemical cleaning)
- Ammonia Plants
- LNG Plants
- Air Separation Plants
- Clean Fuels Projects
- Steam Systems
